PRACTICE WORKSHEET B

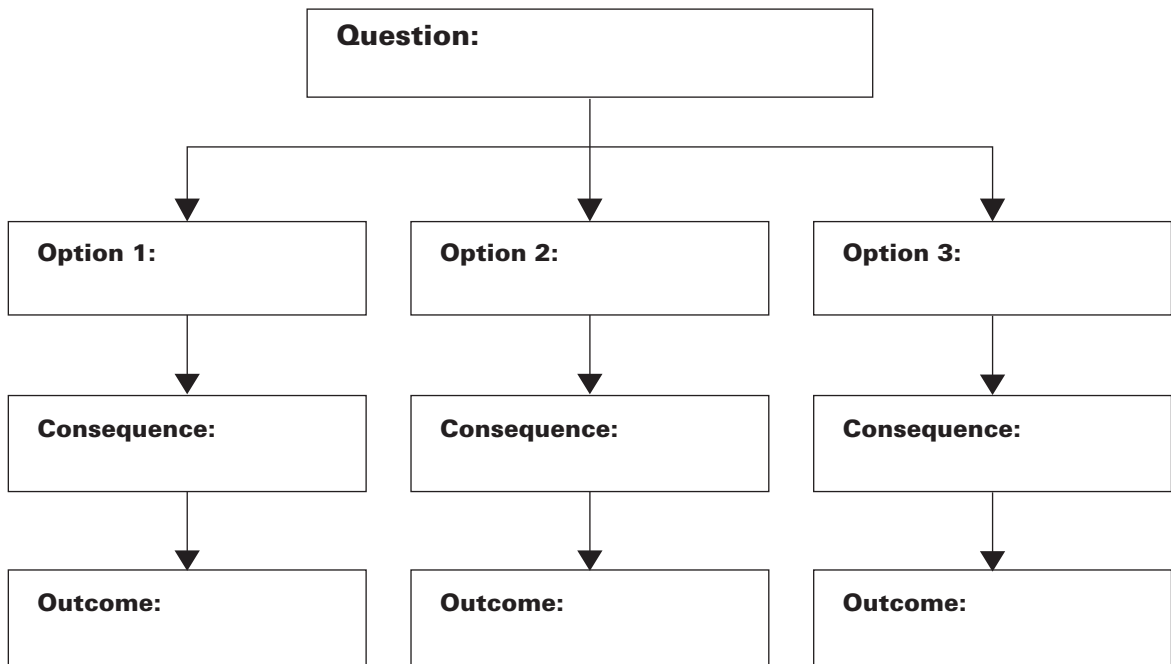

Decision Making

COPYMASTER

Directions: Read the following *summary* of the *beginning* of “Papa’s Parrot,” by Cynthia Rylant. Fill the Decision Tree, listing **two** possible paths Harry might follow. Then, evaluate the decision.

As a child in elementary school, Harry and his friends visited Harry’s father’s candy and nut shop every day after school, even after they stopped liking those snacks. Harry’s father enjoyed the visits from Harry and his friends. When Harry and his friends turned twelve and started junior high school, they had new interests to explore after school. For example, they were into video games, music, and hamburgers rather than candy and nuts.

1.

DECISION TREE

2. Evaluate the decision: Which option, or path, do you think will most likely develop in the story? Explain why on the back of this sheet.
